

Safety alert

Avoid risk to you, your employees and others

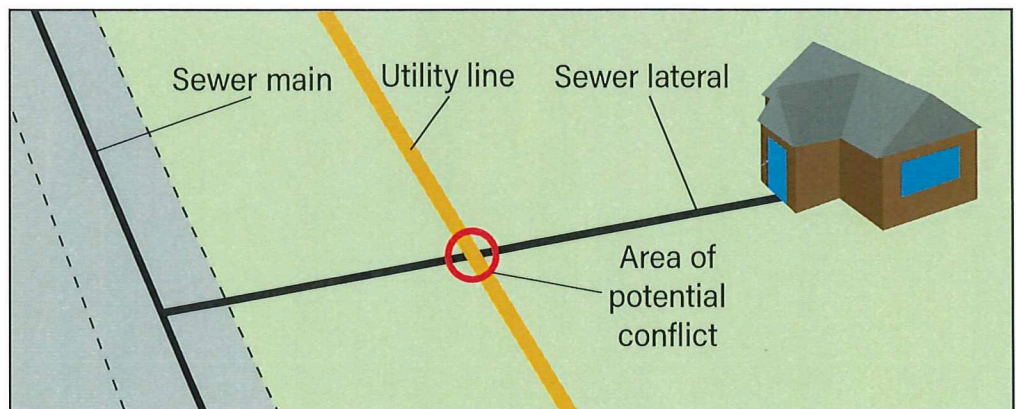

If you are called to resolve a sewer blockage in the North Shore Gas service area, please call **866-573-6867** to determine the location of our underground utilities before starting any clean-out process. There is no charge for this service. There is a possibility that a natural gas line has been inadvertently installed through a sewer line (lateral). As long as a natural gas line intersecting a sewer line is not penetrated, it poses no safety hazard; however, the equipment used to unclog sewer lines can penetrate the natural gas line and lead to the dangerous release of natural gas.

Please take immediate action if you:

- **Smell a natural gas odor** at the clean-out site or inside the building served by the sewer line.
- **See bubbles** rising through standing water or in a toilet bowl.

If these signals are present, stop what you're doing and:

- **Immediately evacuate** the premises and leave open any doors as you exit.
- **Do not turn on or off any light switches**, or use a telephone or cellphone.
- From a safe distance, **call 9-1-1** and North Shore Gas at **866-556-6004**.
